GEU/TBI/26/12/14092026-26100062 **DATE : - 14-09-2026**

LETTER OF RECOMMENDATION

To Whom It May Concern,

I am pleased to recommend **Anmol Rawat**, who completed an internship as an **AI-Assisted Full Stack Web Development Intern** under the **TBI-GEU Summer Internship Program 2026**. During the internship, I had the opportunity to observe his technical learning, project execution, adaptability, and approach to software development.

The internship followed a rigorous, project-based format and provided hands-on exposure to contemporary full-stack development practices, including React/Next.js, REST API design, database integration, and AI-powered application features. An important component of the experience was learning to use AI-assisted development workflows responsibly as a complement to conventional software engineering practices.

Throughout the internship, Anmol Rawat engaged with these technologies with a positive learning attitude and demonstrated the ability to progressively translate requirements into functional development tasks. I particularly appreciated his willingness to work through unfamiliar technical problems rather than relying solely on ready-made solutions.

The internship also required consistent progress against weekly milestones. Anmol Rawat was reliable in completing assigned deliverables and receptive to technical feedback. He demonstrated an ability to learn new tools quickly and showed initiative in exploring how AI-assisted tools could improve development productivity while still requiring human judgment, testing, and validation.

In addition to his technical development, Anmol Rawat demonstrated professional qualities including discipline, perseverance, adaptability, and a constructive response to feedback. These qualities are particularly valuable in software development, where technologies and development practices evolve rapidly.

Based on my observations, I believe Anmol Rawat has the potential to continue developing into a capable software developer and technology professional. I am pleased to recommend him for academic or professional opportunities and am confident that he will approach future opportunities with the same commitment to learning and improvement.

I wish him every success in his future academic and professional endeavours.

Sincerely,

14/9/2026

Ms. Sarishma Dangi

CEO, TBI-GEU
